# LISTD

WHAT WE DO

Listd is a customer and line management service for bars and nightclubs. Through our our online and mobile applications, bars can finally keep better track, monetize, and automate their customer influx. The service is free for all of our clients and the revenue is shared evenly.
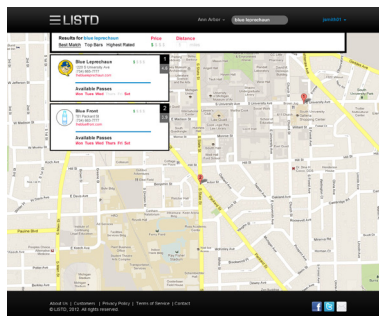

HOW WE DO IT

We have built a website and mobile application that bar owners can use to release passes. These passes can then be purchased by the customers to eliminate wait time for that specific day. In order to better manage the foot traffic, only a limited amount of passes are released for each day. The bars can manage the pass limit along with other features through the bar management applications.
